

BubbleSpa® OVERVIEW

Product Main Features:

- Horizontal 380 mm shower arm (Wall Arm model)
- Vertical 307 mm shower arm (Ceiling Arm model)
- TMV2 Approved thermostatic mixer valve
- Overhead shower 300 mm:
- Ball joint rotation angle ± 10°
- 1 Spray pattern – BubbleRain™
- Advanced LED EdgeLight:
- 3 Light modes – Drops, Chain, Stream
- Hand shower 110 mm:
- Maximum flow of 10 l/min (Overhead shower) and 9.0 l/min (Hand Shower)
- 3 Spray patterns – Rinse, Shower, Massage
- Chrome-effect flex shower hose 1500 mm
- Wall bracket with integrated outlet (Mixer Shower Set)
- Wall bracket (Mixer Shower System)
- Kelda patented Air-Powered™ technology
- Kelda BubbleRain™ spray pattern
- Kelda BubbleTapping shower massage
- Minimum recommended pressure of 1.5 bar and 2.0 bar (Mixer Shower System)
- Suitable for use with combination boiler systems
- IPX4 rated (Overhead shower)
- Supply voltage: 90 – 305 VAC
- Supply rating: 3 Amp fused spur
- IP67 Transformer: 24 VDC
- Maximum power: 25 W
- White / Chrome-effect finish
- 2 Year Guarantee

FREQUENTLY ASKED QUESTIONS

Can I have a BubbleSpa® shower?

BubbleSpa® showers are the perfect solution for your bathroom, en-suite or spa/treatment room. The stylish and flexible designs are available in wall-mounted "Exposed" or built-in "Concealed" options to support retrofit or new/renovation projects.

How does it work?

BubbleSpa® showers feature a digital fan and intelligent microprocessor (positioned within the overhead shower) that controls the delivery of water and air to each of the sixteen precision engineered HydrO₂ nozzles.

As water and air exit the HydrO₂ nozzle, a column of water with air inside forms until it breaks into individual bubbles. Each bubble is designed to be 20 mm in diameter to stimulate the skin and rinse away stress. The newly formed bubbles cascade from each nozzle and the result is Kelda's unique sensory BubbleRain™ experience.

What are the benefits?

BubbleSpa® showers are designed to promote holistic wellbeing and provide homeowners with a luxury spa-like experience, while reducing the wastage of resources from showering.

Each bubble simulates the soft rhythmical fingertip tapping that is synonymous with traditional Swedish massage techniques. Kelda call it BubbleTapping shower therapy. Tapping massage is well known to provide numerous health benefits including blood circulation improvement, strengthening of the immune system and muscle relaxation.

What are the installation requirements?

BubbleSpa® showers require a minimum water pressure of 1.5 bar (2.0 bar for the Mixer Shower System), hot and cold water supply, and electrical connection to the shower installation point.*

Installation requires both plumbing and electrical work. As with any shower, Kelda recommends that all work is carried out by a competent qualified person in line with building regulations.

* Power to the overhead shower is supplied through an electrical cable fitted within the wall/ceiling arm.

Are they eco-friendly and how much does it cost to run?

BubbleSpa® showers incorporate Air-Powered™ technology meaning they use a lot less water than a standard mixer shower. Using less water means less energy (hot water demand) and therefore fewer carbon emissions.

Kelda showers are not only kinder to the planet but they can help lower bills too. It is estimated that a BubbleSpa® shower could save a family hundreds of pounds per year in water and energy costs, compared to a standard spa shower.

How do thermostatic showers work?

A thermostatic shower features a thermostatic valve that mixes both hot and cold water together to a consistent and predetermined temperature. By doing so, this prevents scalding and cold shock which makes it extremely well-suited to multi-generational families.

For added safety all Kelda showers feature a TMV2 approved thermostatic mixing valve so you can be assured of the highest levels of quality.

Can I adjust the light settings?

BubbleSpa® showers feature an advanced lighting effect which illuminates the bubbles to create a high-definition BubbleRain™ spray pattern. There are three light modes: Drops, Chain and Stream. Each mode has a selection of brightness levels to enjoy in various lighting conditions. The light can be activated when the shower is on or off.

How easy are they to clean?

Kelda's HydrO₂ nozzles are much larger than standard nozzles therefore are less likely to become blocked by limescale. That said, water hardness can vary significantly by region so routine cleaning is always advised.

To clean the shower Kelda recommends using a soft clean cloth (using only mild detergents if necessary).

Important: When cleaning never spray water or cleaning agents directly on the overhead shower, since the spray mist may get into the shower head and cause damage. Instead, spray the cleaning agent onto a soft cloth, and use this to wipe the nozzles and surfaces.

BubbleSpa® Shower Guide

www.keldashowers.com/bubblespa

INTRODUCTION

Kelda represents the future of sustainable showering. With its innovative Air-Powered™ technology injecting water into air, it marks the beginning of a new era: one of unrivalled experience, high-efficiency and conscious consumption.

Kelda are proud to introduce the new range of BubbleSpa® showers featuring its patented Air-Powered™ technology.

BubbleSpa® allows consumers to experience water in a way like no other shower. BubbleSpa® technology creates very large droplets filled with air that fall softly on the body for a luxurious shower feel.

Each shower is designed to enhance the bathroom and transform the daily shower routine into a luxury spa experience.

BENEFITS

Innovative sensory shower experience

Kelda's BubbleSpa® showers use the science of air and water to create large droplets filled with air that fall softly on the skin for a luxurious shower feel. The result is Kelda's unique sensory BubbleRain™ experience.

Shower therapy

BubbleRain™ simulates the soft rhythmical fingertip tapping that is synonymous with traditional Swedish massage techniques. Kelda call it BubbleTapping shower therapy designed to revitalise the skin and rinse away stress.

Create a spa-like shower

BubbleSpa® transforms the everyday bathroom into a place of personal sanctuary and tranquillity.
